WORK EXPERIENCE

Niveus Solutions

Udupi

Cloud Associate

January 2023-Present

- Currently working as a Backend Node.js Developer for ICICI Bank, specializing in account opening projects.
- Responsible for developing and maintaining backend infrastructure using Node.js to ensure seamless and efficient account opening processes.
- Actively participate in code reviews, debugging, and performance optimization to enhance the overall reliability and performance of the account opening projects at ICICI Bank.
- Lead and manage multiple backend microservices, demonstrating expertise in architecture, development, and maintenance. Showcase a deep understanding of microservice implementation.
- Awarded "**Star of the Month**" in October 2023 at Niveus Solutions for exceptional dedication, hard work, and commitment in completing tasks, along with a proactive approach to overcoming challenges.

Avysh

Bangalore

Software Engineer

February 2021-December 2022

Avysh is a B2B channel commerce and engagement platform for Brands, Dealers and Distributors.

- Developed a Loyalty Campaign feature using Webix with Node JS to engage channel partners with the brand.
- Developed an Architecture to save multiple users with same phone number for channel partners and login with same number as different users.
- Designed and built Multilingual Support for Avysh's E-commerce Platform using Node JS and handlebars.
- Redeveloped the flow of Level and Tier selection for Channel Partners.
- Fixed bugs, showstoppers and improved application performance by 80%.
- Worked on various features assigned and took ownership of the particular feature.
- Understood and implemented the needs of B2B & B2C market in the current application by continuously communicating with business/product team.
- Being a part of technical hiring team, interviewed various candidates, who fits to our start-up company culture.

The Freelancer Network

Udupi

Freelance Developer

June 2019-January 2021

- Joined as an intern, developed [The Freelancer Network](#)'s official website.
- Promoted to freelancer and developed frontend websites for clients, based on the prototype provided by the designer.
- Worked on several freelancing web development projects. [Click here](#) to find all Projects.

TECHNOLOGY PROFICIENCY

- Languages : Javascript, C++
- UI development : HTML, CSS
- Frameworks/Library : React, Node.js, Express.js, Bootstrap
- Database : MySQL, MongoDB
- Version Control : Gitlab
- Cloud technologies : Docker, GCP, Kubernetes

PROJECTS

TREK BOOKING WEBSITE

<https://hollas-travel-booking-app.netlify.app/home>

React, Node, MongoDB

- Developed a MERN stack trek booking website featuring Firebase authentication for secure admin login, enabling administrators to perform CRUD operations on trek listings and view participant details. Implemented a user-friendly interface allowing end users to add multiple participant details and book treks.

PRICE PORTAL

<https://hollas-price-portal.netlify.app/home>

React, Node, MongoDB

- Developed a MERN stack price management portal for small businesses, integrating user authentication and intuitive categorization features to enable secure login and efficient organization of product inventory. Implemented backend logic for accurate price management, empowering shopkeepers to seamlessly update and control their pricing data.
